## **FOR IMMEDIATE RELEASE**

**Anthony Dillulio's Project named Overall Outstanding Project at  
NAWIC's 16<sup>th</sup> Annual Block Kids Competition**

**Anthony , a 4<sup>th</sup> Grader at Cedar Lane Elementary School built a futuristic  
convenience store power station using solar panels to make energy to "fuel"  
electric cars using 100 interlocking blocks, a string, a rock, & a piece of  
cardboard.**

**Over 80 students participated at NAWIC's 16<sup>th</sup> Annual Block Kids  
Competition on February 6, 2009 at Hodgson Vo-Technical High School.**

**After the projects are completed, a team of judges, professionals from the  
construction industry including owners and architects, meet with the  
students to discuss their work before awarding prizes.**

**Anthony's project is being submitted for regional competition and could be  
submitted for national consideration, as well.**
